Choose the Strongest Roofing and Siding Material

Thicker, stronger Strongpanel painted and galvanized steel roofing and siding combines deep, rich, earth-tone colors with board-and-batten design to present an attractive appearance for any type of building. Painted Strongpanel is produced in 15 standard colors and bare galvanized.

Color-coated Strongpanel fights rust better because it provides extra protection and, thus, long-lasting durability.

And Strongpanel is warranted, twice! It has a 45-year warranty on its paint finish and a limited 10-year warranty against acid rain corrosion. Every sheet of Strongpanel carries a manufacturer's ID code number on the interior surface that provides an extra measure of protection for the user and a reminder that

Strongpanel quality is backed by Metal Sales – an industry leader for over 40 years. Strongpanel features include:

- **Heavier and Stronger:** A leader in the industry
- **Durable:** Multi-layered protection including G90 zinc coating on both sides
- **45-Year Paint Warranty:** Including 10-year edge corrosion protection
- **Quality Features:** Exclusive weather-tight, non-leak drain rib, 5/8" rib height, 36" coverage, applies over open framing or solid substrate, minimum roof slope 3:12, exposed fastened panel
