

EM15-622 WALL

Condensed Technical Reference

PANEL ATTACHMENT

FASTENING INFORMATION

• Concealed Wall Clip - 4" Low is 1-3/4" x 4" x 3/8", from 16 ga, G90 material with 2 fastener holes.

• Clip Fastener(s) should be driven just to contact between fastener head / clip / support. Over-driven fasteners can cause panel distortions.

• Fasteners should extend 1/2" or more past the inside face of the support material for steel and wood sheathing support materials.

 Clip Fasteners: Attaching to Wood: #12-11 Low Profile Wood Screw

> Attaching to Steel: < 18 ga: 1/4"-13 Deck Screw ≥ 18 ga, ≤ 12 ga: #10-16 Pancake Head Driller > 12 ga: 1/4"-14 Self Driller, No Washer

INSTALLATION DIRECTION

Horizontally-oriented panels must be installed from the bottom to the top.

Vertically-oriented panels may be installed from the right-to-left or left-to-right.

SECTION PROPERTIES									ALLOWABLE UNIFORM LOADS, psf For various clip spacings

1. Theoretical section properties have been calculated per AISI 2016 'North American Specification for the Design of Cold-Formed Steel Structural Members'. Ixx and Sxx are effective section properties for deflection and bending.

2. Allowable loads are calculated in accordance with AISI 2016 specifications considering bending, shear, combined bending & shear, deflection and load testing on 16 ga girts of comparable profiles. Panel weight is not considered. Allowable loads do not consider other support conditions including web crippling, fasteners or support materials.

3. Allowable loads consider the 3 or more equal spans condition.

- 4. Deflection consideration is limited by a maximum deflection ratio of L/180 of span.
- 5. Allowable loads do not include a 1/3 stress increase for wind.
