IMPORTANT NOTES

Formed structural members available in 16, 14, & 12ga

Available from 4" to 12" web sizes

Minimum length 4', Max length 45' -Cut charge of \$3.00 per cut for pieces 1' to 3'11".

Sub-girts and structural clips available

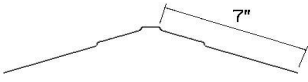

Eave Struts, Base Angles, and up to 32' long custom shapes.

Part punching available. Please inquire for offering.

Phone: 5306685690 **Fax:** 8003649609
Email orders: orders.woodland@metalsales.us.com

Ordering Product

Metal Sales only sells product to established accounts. Customers can order using one of three easy methods: phone, fax, or e-mail, as shown above.

When placing your order, please provide:

- your company name
- the name & phone number of person placing order
- the purchase order number and job name
2024
- profile name, gauge, color, quantity, and lengths
- quantity, color, and angle (where applicable) on standard trim flashings
- a faxed drawing of all custom trim shapes, specifying quantity, gauge, dimensions, color and degree of all angles (roof pitch)
- a list of needed accessories

*** IMPORTANT ***

On a per order basis, please utilize only one media when placing your order - phone, fax, or e-mail. Although we attempt to isolate duplicate orders, the use of different ordering methods will increase the likelihood of order duplication. Any order sent to us using two different media, resulting in a duplicated order, will be the customer's responsibility.

Ordering Deadlines for Delivery

Metal Sales-Woodland has established, for each customer, very specific ordering "cut-off" deadlines. Because the time between ordering and delivery is very short, the ordering "cut-off" schedules must be followed. Custom trim orders, during peak times, may have longer lead times. Orders placed that miss a "cut-off" deadline will be handled as a part of the next cut-off and delivery schedule.

Order Changes and Cancellations

- All requests to change an order or cancel an order must be made through the Woodland Customer Service Rep (CSR).
- All orders, once placed, are considered final and could be manufactured immediately.
- All panel profiles, secondary framing members (Cs & Zs), special order accessories, trim flashings, architectural / commercial standing seam flashings, and custom-made trim flashings are made to order and cannot be cancelled once produced / received.
 - All orders, if not manufactured and not involving special order materials, may be changed or cancelled by contacting the Woodland Customer Service Rep (CSR) but may be subject to new lead times and delivery dates.

Claims of Product Defect / Damage

- All products received from Metal Sales should be inspected within 48 hours to verify accuracy and condition. Any product problems should immediately be communicated to Metal Sales. In the unlikely event that a product quality issue is encountered during installation, further installation should be halted, and Metal Sales should be notified immediately. Metal Sales will not accept responsibility for any installed product beyond 10 squares.

Product Returns

- All panel profiles, secondary framing members (Cs & Zs), special order accessories, trim flashings, architectural / commercial standing seam flashings, and custom-made trim flashings are made to order and are **non-returnable**.
- All requests for product returns must be made through the Woodland Customer Service Rep (CSR). Metal Sales' invoice number is required.
- All requests for product returns must be made within 45 days of invoice. Items over 46 days old will not be eligible for return.

- All approved returns will be issued a Return Goods Authorization (RGA) number by the CSR.
- Metal Sales' drivers will not pick up any product unless an RGA has been issued and provided to them by the CSR.

- All approved returns must be returned in prime condition for immediate restock and resale. Items that are not in resalable condition (opened, dirty, damaged, etc.) will not be credited. Items that are returned in resalable condition are subject to a 25% restocking charge.

- Product mis-manufactured or damaged by Metal Sales may be returned for credit. Metal Sales must be notified of any such problem within 48 hours of delivery. Metal Sales will replace the product(s) and will process an RGA to bring the defective product back. New items ordered to replace the items claimed to be defective / damaged may be invoiced until a field inspection of the product(s) has been conducted. If Metal Sales is in error, full credit for the damaged / defective product will be issued.

Product Add-Ons

- Standard stock accessories (including screws, clips, mastics, closures, rivets, t/u paint, etc. but NOT INCLUDING trim, fiberglass panels, flat sheet or roll valley) may be added to the delivery truck after the established order cut-off deadline if the request is received by 1200pm prior to the day the truck is loading.
